

NGINX

NGINX: Lab - try_files in NGINX Conf

NGINX : Web-Server & Load Balancer

- **try_files:** The `try_files` directive can be used to check whether the specified file or directory exists.
- NGINX makes an internal redirect if it does, or returns a specified status code if it doesn't.

Will see you in Next Lecture...

Thank you!

A close-up photograph of a hand holding a black marker, completing the cursive word 'Thank you!' on a white surface. The marker is positioned at the end of the exclamation mark, and the hand is visible on the right side of the frame.

See you in next lecture ...
