

NGINX

NGINX: Lab - Variable NGINX

***NGINX** : Web-Server & Load Balancer*

- **Variables:** NGINX configuration can hold the variable and NGINX variable can hold the String Value.
- Set directive is used to assign variable in NGINX.
`set $a "hello world";`
- User can put conditional statements on basis of variables.
- Few Important inbuilt variables:
 - `$args` - List of arguments on the request line.
 - `$body_bytes_sent` - Number of bytes sent to the client.
 - `$bytes_received` - Number of bytes received from a client.

***NGINX** : Web-Server & Load Balancer*

- `$connection_requests` - Current number of requests made via connection.
- `$date_local` - Current time in the local time zone.
- `$hostname` - Host name .
- `$nginx_version` - Shows the nginx version.

Will see you in Next Lecture...

Thank you!

A close-up photograph of a hand holding a black marker, completing the cursive word 'Thank you!' on a white surface. The hand is positioned on the right side of the frame, with the index and thumb fingers visible, holding the marker. The marker's tip is just finishing the exclamation mark. The background is a plain, light-colored surface.
