NGINX: HTTP Response Codes

NGINX : Web-Server & Load Balancer

➤ HTTP Response code define the status of Request.

➤ Status-Code element in a server response, is a 3-digit integer where the first digit of the Status-Code defines the class of response.

➤ **1xx: Informational** - It means the request has been received and the process is continuing.

➤ **2xx: Success** - It means the action was successfully received, understood, and accepted.

➤ **3xx: Redirection** - It means further action must be taken in order to complete the request.

➤ **4xx: Client Error -** It means the request contains incorrect syntax or cannot be fulfilled.

➤ **5xx: Server Error** - It means the server failed to fulfill an apparently valid request.
